EDUCATION

French Azerbaijani University   Baku, Azerbaijan
Master's in Computer Science   *Sep. 2022 – Jul. 2024*

Baku State University   Baku, Azerbaijan
Bachelor's in Computer Science   *Sep. 2018 – Jul. 2022*

EXPERIENCE

Frontend Developer   Feb. 2024 – Sep 2024
Perfect Infinity   *Remote*

- Built core modules for *project management platform*, including task tracking, sheets, and document operations, improving internal workflow efficiency for project team
- Developed features for *home-improvement marketplace project*, enabling users to create project requests, compare contractor offers, and accept proposals through a smooth multi-step UX
- Implemented city-based flows for *rent-a-car platform*, including filtering, document submission, online payments, and dual login roles for renter and customer

Frontend Developer   Dec. 2021 – Feb. 2024
Taskilled   *Baku, Azerbaijan*

- Developed a full Hackathon Module, enabling users to form teams, upload projects, and present results — a feature that gained attention from ASAN Service and the Ministry of Education
- Built a dynamic Groups Module, where users could join interest-based communities, share content, and interact; also added admin moderation tools to improve content quality
- Created a Bootcamp Module supporting multi-course structures, pricing management, and request for scholarship logic (via Technest), improving user enrollment and program flexibility
- Implemented multi-language support (via i18n library), allowing seamless language switching across the platform

PROJECTS

Project Management Platform | *Next.js, TypeScript, Tailwind CSS, Shadcn-ui, Auth.js*   Feb. 2024 – Jun. 2024

- Built core modules for the project, including task tracking, sheets, and document operations, improving internal workflow efficiency for project team
- Developed responsive, user-centric UI components to ensure accessibility and consistency across devices
- Integrated secure authentication and role-based access, protected routes, and form validation for business-critical flows
- Collaborated with backend and UI/UX teams to deliver clean and maintainable frontend code

Taskool | *React.js, TypeScript, Styled components, React Query, Mantine UI, i18n*   May 2023 – Jan. 2024

- Built Olimpiads Module allowing students to register, submit problems, track results, and view leaderboards for academic competitions
- Created Advanced Specialization Program (TIP) Module to analyze 8–10th grade students' interests and abilities, recommend suitable future majors, and integrate instructional videos
- Implemented multi-language support to improve accessibility for students studying in Russian and English
